

TESTIMONY

I am Eduardo Poblete Abutan from Novelita Cavite. I am an electrician. For almost a year, I experienced pain in the right side of my body and I had trouble because I always urinate especially at night. I had tried to endure these symptoms but at the end I capitulated and went to a doctor for check-up. He advised me to have an ultra-sound in my whole abdominal, results showed that my prostate has "parenchymal cyst" and my liver has "moderate diffuse fatty infiltration". I was also diagnosed having "cholesystolithiasis".

Then I tried Picur and after two days, I noticed that I didn't have trouble sleeping and I seldom urinate at night. My wife advised me to take two capsules a day- one in the morning before eating and one at night before sleeping. After two weeks, I had already consumed one bottle (30 capsules) of Picur and I observed that I can't feel the pain anymore.

Picur helped me a lot and I think it cured me, in fact I even noticed that my blood pressure doesn't go up anymore.

My only advice to those who had the same ailment as me "don't hesitate and just drink Picur instead" because having illnesses should not to be treated as a joke.
