

# TESTIMONY

I am Digna Calabia, 57 years old, from San Pablo City and I'm into Multi-level-Marketing or Networking. I'm a hardworking Mom, and since I am into a networking business most of the time I'm at the field. After work I used to clean the house. That was my routine for years already, even if I'm tired I normally take a bath.

Maybe because of work related stress I used to experience some pain in my back and knee that I could hardly stand and cannot sit for a longer period of time. Also, it runs in the family.

It was only accidental that I met one of my friends in the plaza and he introduced me to "PiCur". My daughter whispered "Mom, try to take 1 capsule and said "who knows, it could help ease the pain in your back". That time I suffered from that back pain for almost a week already.

Amazingly, after 2 hours of taking a capsule of PiCur I noticed that the pain was gone.

I bought 7 bottles of PiCur, and shared some capsules to my friends. I was amazed that all those people called up and bought a bottle of PiCur, it was then that I concluded that the product was really effective.

The product speaks for itself. Now, I continuously take PiCur, I can work fulltime without experiencing back pain. And because PiCur is amazing, I felt good that I also helped people suffering from different illnesses. Their health improved a lot and not only that; they also have a good source of income.

PiCur is really one of a kind. I recommend it to everyone not only to those people who are sick but it's also better to take PiCur as a defense from sickness.

It helps boost the immune system, with its high antioxidant level it is known worldwide and it also has a unique blend. Protect yourself and your family. It is priceless to know that you have helped a lot of people. So once you tried it share the good news!!!
