

# TESTIMONY

My name is Mercedita Tabanao, 18 years old from Santa Ana Avenue, Davao City and I'm a working student.

During my monthly period I used to suffer from so much pain due to dysmenorrhea, I even cried because I can no longer endure the pain plus I also have a boil. Every time I have my monthly period I used to experience the same kind of pain. I cannot even stand and do my chores.

My dysmenorrhea is a burden to me ever since, so I tried taking PiCur and my life started to change. After taking PiCur my dysmenorrhea is gone and also my boil. My monthly period is of no hassle to me since I don't have a dysmenorrhea anymore.

PiCur really helped me a lot it makes me healthy and so my life really changed. Now, I'm telling all my loved ones, friends and those who are suffering from dysmenorrhea to take PiCur because it will really help them solve all the illnesses they have.

PiCur is very effective and also cost effective. It's very cheap compared to other medicines that are not effective. Start Taking PiCur for a healthier better life.
