

TESTIMONY

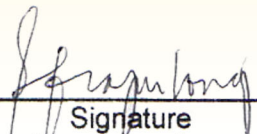

My name is Susan Capulong, I'm 57 years old, from Balagtas St. San Pablo City and a House wife.

I have been suffering from severe migraine since I was 16 years old. I got addicted to medicines and paracetamols just to relieve my headache, until a friend of mine told me to try and take PiCur.

After 2 days of taking PiCur I noticed some changes, the usual migraine/headache was gone. I continued taking PiCur and even under the striking heat of the sun, a sudden change of the weather and even if I'm loaded with work I can still do a lot of things worry free.

Now I can work well the whole day. Even if I'm stressed and loaded with work rest assured that my headache is gone or won't strike again. I don't have to take medicines and paracetamols or any pain reliever. Thanks to PiCur.

To those people who's experiencing the same pain that I experienced, Try PiCur! Don't hesitate to try it, it's really good and affordable. Why suffer more when there is cure.
